

The profile

OVERVIEW

At **IT Solutions** we believe that technology can and should bring ease of use, clear business benefit and increased user satisfaction to all businesses.

We improvise, analyse, design and develop the technological side of your business. Be it a simple or a complex IT need, we are here to help. We have complete and full proof IT Solutions and a 100% guarantee that comes with our range of services and packages to meet the needs of small, medium or big businesses. When choosing a IT firm it is important that you feel comfortable with the quality of their work, their experience and most importantly their prices.

MANAGEMENT

Our top level management have decades of marketing and business experience having held seats as CMD and CEOs of large to mid-size corporate. With their study of your business and inputs, we are certain to provide you invaluable and unmatched consultancy, services and software solutions to help you bring your new project to life or make your current project highly efficient and popular to the masses to ensure growth beyond your current imagination.

Full Cycle Software Offering	Strong Business & Technical Expertise	Our Principal & Way We Work
Our philosophy is to focus on enduring relationships by being able to support our customers through their entire system lifecycle - starting with the elaboration of the basic ideas and making the first sketches, right up to actual implementation and long-term maintenance. Every stage is equally important for final success and we take full responsibility in ensuring the client gets the best results possible.	We improvise, analyse, design and develop the technological side of your business. We have an excellent and experience team of professionals from various background and academics. Our vision is to be a global leader in providing value-driven solutions by leveraging technology to enable our customers to reach their focused business growth.	- We listen - We empower people - We act with integrity and respect - We enjoy what we do - We are open and approachable - We are creative - We say what we will do and we do it

SERVICES

Today's reality is that many companies do still have some process gaps or business challenges which are not supported by its' current IT set up. None of the software packages are fully capable of addressing all the business needs because of specificity or uniqueness in the business. To bridge such gaps and challenges, Agile and scalable solutions are required to fit in within existing IT set up. STP has clustered experts from SAP and IT world who carries specific business knowledge or IT skills to

S T PRITHIMA TRADING PVT. LTD.
